

## **Project #1: First Webpage**

**Start:** 01/08//2017

**Draft Due:** 01/15/2017

**Final Due:** 01/25/2017

**Submission Guidelines:** For the draft you will deploy this to GitHub Pages.  
For the Final Draft this project will be deployed in the projects section of your portfolio.

**Overview:** Using strict HTML & CSS, build an informational webpage about a topic of your choice.

### **Requirements:**

- Create a wireframe of an application and submit.
- Use HTML & CSS to build a storefront application
- The site may be fictional or contain actual information
- Alternative route may be to create a store page (see examples below)
- Deploy to [GitHub Pages](#).
- Here are a few examples for the projects:
  - [https://duder63.github.io/store\\_app/](https://duder63.github.io/store_app/)
  - [https://github.com/Duder63/duder63.github.io/tree/master/store\\_app](https://github.com/Duder63/duder63.github.io/tree/master/store_app)
  - [Ethan Ransdell's Coffee Mug Project](#)
  - [Carolyn Harris's Make Up Store](#)
  - [Travis Falls's Design Store](#)
  - [Brandon Schaaf's VCR Store](#)

### **Example of a Basic Wireframe**
